

PLASTIC

Packaging toothpaste

- Stuff: plastic
- Decay time: a few hundred years

Which may arise?

Alternative fuel

Recycling:

- you do not need to waste time and already sure of water for washing tube from the remnants of toothpaste - it does not interfere with the sorting machines
- buy big pack paste to you produce less garbage

PLASTIC

Box of the fruit

- Stuff: plastic
- Decay time: a few hundred years

Which may arise?

New boxes

Recycling:

- box, in which are packed fruits, immediately goes into the trash. If possible, choose fruits weight. Find a bazaar close to home. There buy fresh produce and in such amount as is required of
- crush box before throwing the container

PLASTIC

Box of powder

- Stuff: plastic
- Decay time: 500 years

Which may arise?

Of the 450 boxes of washing powder you can make triple the park bench

Recycling:

- best to use them repeatedly
- buy large packs (powder doesn't spoil), then you produce less garbage than several smaller

PLASTIC

Empty cartridge pen

- Stuff: plastic
- Decay time: a few hundred years

Which may arise?

Alternative fuel

Recycling:

- the ideal solution would be to buy a bottle of ink cartridges and filling - to school, but it would be difficult to carry and don't pour
- pay attention to information from the manufacturer, some companies are doing school supplies with recycled materials
- empty cartridge doesn't need to be cleaned, the remnant ink will not harm the machines during the sorting operation

PLASTIC

Box of electronic equipment

- Stuff: plastic
- Decay time: a few hundred years

Which may arise?

Alternative fuel

Recycling:

- separate part of the paper and put it in a separate container
- if the packaging is convex, like the headphones, try to crush them to reduce the surface, which will take in a container

PLASTIC

Bottle cap

- Stuff: plastic
- Decay time: a few hundred years

Which may arise?

New caps, pipes, buckets, computer cases

Recycling:

- unscrew the bottle, crush and spin before throwing - so it doesn't return to its original shape and it will take up 80% less space in container
- transporting the nuts themselves is difficult, because the shedding of bags. Better to leave them on bottles

BIO

Potato peelings

- Stuff: organic
- Decay time: few weeks

Which may arise?

Rinse hair

Recycling:

- 1 kg of potatoes produced approximately 400g peelings
- from washed peelings you can make... chips
- inner potato peels relieve pain from burns
- it can be stored on compost

BIO

Peel of banana

- Stuff: organic
- Decay time: 2-5 weeks

Which may arise?

Biopolymers used for electrical insulation

Recycling:

- chopped banana peel is suitable for drinking water treatment - captures water from copper and lead
- peel contains a lot of natural oils, so it can be used for polishing leather shoes
- wrap with peelings soothes sunburn and insect bites
- fertilizer

PLASTIC

Bottle of shampoo

- Stuff: plastic
- Decay time: 500 years

Which may arise?

New bottles, helmet

Recycling:

- plastic consists mainly of petroleum, it is harmful to the environment
- plastics can be processed up to 10 times, it saves new raw materials
- bottle can be emptied from the remnants of shampoo. in order not to waste water, best to do it while bathing

BIO

Orange peel

- Stuff: organic
- Decay time: 2 years

Which may arise?

Cleaning lotions, skin peeling

Recycling:

- dough additive
- the smell of orange repels mosquitoes - just wipe the padded side of the peel

GLASS

Bottle of oli

- Stuff: glass
- Decay time: doesn't decompose!

Which may arise?

New bottles

Recycling:

- unscrew the nut, remove caps, plugs and other things that are not made of glass, for example a foil label - we put them in a container for plastic
- we do not take off sheet metal wheels from the neck of the bottle - it is easy to hurt, and the smelter are special machines that will catch pollution
- we do not waste water to wash residual oil - it does not hurt it in the recycling process

GLASS

Bottle of drink

- Stuff: glass
- Decay time: doesn't decompose!

Which may arise?

New bottles

Recycling:

- in one piece suitable for recycling
- you can process them repeatedly
- search in shops of beverages in returnable bottles, so that less waste is landfilled, as well as forests and river banks

PAPER

Paper of meat

- Stuff: paper
- Decay time: 6 months

Which may arise?
Alternative fuel

Recycling:

- greasy paper or remnants of food we throw out the trash
- if greasy paper goes to paper mill, can clog the mesh filter paper
- however, you can regain energy - creation of briquette, or alternative fuel used in blast furnaces, for example, cement plants

METAL

Can of cat food

- Stuff: metal
- Decay time: 10 years

Which may arise?
New cans, dishes

Recycling:

- production of can from scrap instead of new raw materials, saves 96% of energy and less water pollution (97%)
- less garbage in the woods and along the rivers, it is also less wounds - the sharp edges of the cans can injure animals
- more of the metal in the market causes a decrease in the prices of new products, and it's saving for a home budget

GLASS

Bottle of the cure

- Stuff: glass
- Decay time: doesn't decompose!

Which may arise?
New bottles

Recycling:

- if we have been a little medication bottle with him we bring to the pharmacy to a special container for expired drugs
- empty bottles thrown into the containers for glass
- the recycling 1 ton of glass can save 603 kg of sand, 25% of energy and 50% of water
