GENERAL OBJECTIVE

THE MAIN OBJECTIVE of our project is to develop our schools as institutions that promote the kind of education which takes place in an intercultural perspective in order to prevent & reduce school exclusion and failure.

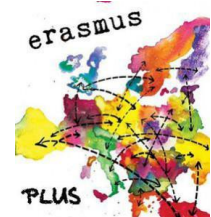

ACTIVITIES

According to the objectives, we have designed four directions to define four stages of the project progress. They are:

- I. Partners around oceans and seas
- II. The music all around: the rhythm and the sound
- III. Around the fire: "Let's become all artists"
- IV. Together for peace: Sharing our experience in the field of intercultural dialogue for peace and inclusion beyond the project borders.

It is about our final product: "Around the fire" - an open online Interactive Platform to collect our stories and feelings related to art, music and traditions

EXPECTED RESULTS

The results are a materialized expression of the objectives as we intend to create diverse materials to be used in classes for regular use or in non-formal contexts. They will be posted in the project TwinSpace regularly & the outcome of the project will be a Project Interactive Platform representative of all our common experience, collecting stories & other important cultural items created by our students. What's more, not only will visitors outside the project access our base, they will have the facility of uploading themselves new interesting materials on the topic, enriching & diversifying our final product. There will be conclusions & steps to be taken consequently, we will hopefully be glad to emphasize the change in student attitude & reaction towards the multicultural environment so as they will be able to become young people fit for a dynamic society & labour market.

EXPECTED RESULTS

Combat with Failure and Early School Leaving: In our schools, one of the most important reason of failure is bot being able to be or feel a part of the society they live in. Also, not knowing how to behave, react, interpret the events they are not familiar with. If we break this walls, then, school environemts will be better.

ICT and Language Skills: All participants will use ICT devices so much in a true way that, they are going to create videos, search informations, join cpmptitions, contribute to virtual activities etc. Thanks to ID&EU, participants will understand the EU policies, bodies, rules, norms and future plans better.
