Guadeloupe - a place of the legends

- ❑ Guadeloupe is an archipelago in the eastern part of the Caribbean . It is an overseas department of France with 26 regions.

- ✓ Guadeloupe is divided into several islands: two main islands, Basse-Terre and Grande-Terre, which are separated by a narrow channel known as the Salt River. In addition, there are smaller, adjacent islands: La Désirade, Marie-Galante and Les Saintes, the latter forming an archipelago of nine islands, of which only two are inhabited.
- ✓ It is the perfect place for a tropical/exotic holiday all the year.
- ✓ Guadeloupe has been inhabited since the 3rd century BC, when the Arawak Native American tribes lived here. Later, they were driven out by the Caribbean tribe until the 8th century, renaming them Karukera Island or "Island of Beautiful Waters".
